Know Me Better

Self-taught Frontend Developer with a passion for transforming creative concepts into responsive, user-centered web applications. Skilled in JavaScript, React, and Firebase, with experience in crafting interactive and seamless user experiences. Committed to continuous learning and applying the latest industry trends to drive innovation in web development.

Education

B.Com Graduate   **July 2020 – July 2022**
Bundelkhand University

Senior Secondary   **2019**
St. Mary's Sen. Sec

Projects

Meet | *My Portfolio*   **Visit Site**
- Centralized showcase featuring projects for a comprehensive portfolio overview.
- Built a unique loading screen inspired by Far Cry 3 aesthetics, using JavaScript and CSS animations.
- Demonstrates technical skills with React, GSAP, and creative front-end design..

Hearts And Quills | *Personal Project*   **Visit Site**
- Developed a timed writing tool with a 10-second inactivity challenge using JavaScript, promoting uninterrupted creativity.
- Implemented Firebase-based user authentication with secure sign-up and login functionality.
- Designed an engaging, focus-driven interface to enhance user engagement and fluid writing.
- Integrated a copy feature for users to save completed work externally.

Think | *Personal Project*   **Visit Site**
- Employed GSAP for seamless animations, enhancing user experience.
- Implemented a custom cursor for a refined and interactive interface.
- Elevated user engagement with a captivating background soundtrack.
- Merged lines and minimal words to form a visually compelling creative canvas.
- Transformed static illustrations into interactive stories, engaging users with a click.

Spotify | *Spotify Clone*   **Visit Site**
- Leveraged the power of JSON to manage and present music data.
- Play, pause, rewind, fast-forward, and adjust volume with user-friendly controls.
- Added keyboard shortcuts for smooth and efficient exploration.

Tesla | *Tesla Clone*   **Visit Site**
- User-friendly interface for easy and intuitive exploration of the content.
- Implemented snap scrolling to elevate the overall user experience.
- Successfully replicated Tesla's dropdown menu, with precision, optimized for larger screens.

Netflix | *Netflix Clone*   **Visit Site**
- Utilized 2 APIs, YouTube's and TMDb's to fetch movie ratings and comments for real-time user engagement.
- Enabled automatic movie trailer playback on hover, enhancing interactivity.
- Designed a dynamic hero section that updates trending movies with each page reload.

Skills

Technical Skills
- JavaScript, React.js, Redux-Toolkit, Tailwind CSS, GSAP,
  Firebase, UI/UX Design, REST APIs, JSON, HTML, CSS

Soft Skills
- Collaboration, Problem Solving, Attention to Detail.
